DETAILED ACTION

This application has been examined. Claims 1-18 are pending.

Priority

This application claims benefits of priority from PCT Application PCT/IB04/52634 filed December 2, 2004 and Foreign Application 200310123353.2 filed December 15, 2003. (CHINA)

The effective date of the claims described in this application is December 15, 2003.

Information Disclosure Statement

The Applicant is respectfully reminded that each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in 37 CFR 1.56.

There were no information disclosure statements filed with this application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salmonsens (US Patent 7209874) further in view of Silen (US Publication US 2002/0116518).

Salmonsens disclosed (re. Claim 1) method for playing a content, comprising the steps of receiving the downloaded content according with the detected bandwidth; (Salmonsens-Column 23 Lines 50-65) and playing the downloaded content combined with the pre-stored content. (Salmonsens-Column 24 Lines 35-40)

While Salmonsens substantially disclosed the claimed invention Salmonsens did not disclose reading a pre-stored content which include information relevant to a downloaded content; detecting available bandwidth; sending a request for downloading the downloaded content according to the information relevant to the downloaded content, wherein the request includes the information of the bandwidth.

Silen disclosed (re. Claim 1) reading a pre-stored content which include information relevant to a downloaded content; detecting available bandwidth; (Silen-Paragraph 19-23) sending a request for downloading the downloaded content

Art Unit: 2444

according to the information relevant to the downloaded content, wherein the request includes the information of the bandwidth. (Silen-Paragraph 26-Paragraph 29)

Salmonsens and Silen are analogous art because they present concepts and practices regarding presentation of media over a network. At the time of the invention it would have been obvious to combine Silen into Salmonsens. The motivation for said combination would have been to enable adjusting a presentation frame size based upon detected bandwidth.

Claims 4,7 (re. method) is rejected on the same basis as Claim 1.

Claims 10,13,16 (re. a device) is rejected on the same basis as Claim 1.

Salmonsens-Silen disclosed (re. Claim 2,5,8,11,14,17) wherein the request includes a URL of a website on which the downloaded content is stored. (Silen-Paragraph 21)

Salmonsens-Silen disclosed (re. Claim 3,6,9,12,15,18) wherein the detecting step is arranged for detecting throughput of effective information transmitted within a specific period. (Silen-Paragraph 33)

Conclusion

Examiner's Note: Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the enclosed PTO-892 form.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREG BENGZON whose telephone number is (571)272-3944. The examiner can normally be reached on Mon. thru Fri. 8 AM - 4:30 PM.
